

Plug and Play Interactive Display

For Advertising, Entertainment and Promotions.

The Cube is a compact, portable, turnkey unit that projects an approximately 90" diagonal interactive display onto the floor or wall for high-impact branding, advertising, entertainment and product promotion. Over 50 eye-catching special effects and games that can be controlled with simple hand and body gestures come included with the system. The Cube draws customers in and keeps them engaged as they absorb your message.

Durable. Robust. Reliable.

The Cube is TUV, CE, CSA and EMI certified and manufactured in an ISO-certified facility. All components are contained inside a 60 lb case measuring about 23" x 18" x 16". With a screen resolution of either 1024 x 768 or 1200 x 800 and 2500 lumens, the display is bright and clear. The Intel® Core™ 2 Duo Processor with 2GB RAM supports any combination of static images, sound, video and Flash. A mouse and keyboard are included.

Flexible. Versatile. Easy To Use.

The Cube is incredibly simple to use. Just plug it in and turn it on. Use the content that comes with the system and quickly change backgrounds yourself, create your own content or ask us for help to customize the effects. The Cube can be linked to a server, making it easy to retrieve user metrics and system information to support ROI analysis.

Unlimited Market Applications.

The Cube is the perfect, cost-effective solution for retail spaces, trade shows, special events, hospitality venues, waiting rooms and location-based entertainment facilities. If you are a systems integrator, exhibit fabricator or agency specializing in advertising, marketing, special events or promotions, the Cube is for you.
