

Multi-Touch Point and Control Technology

Get in touch with the future

GestureTek's surface computing solutions can transform any ordinary surface - like a table, bar top or wall - into a natural interface to dynamic content in the virtual world. Access, control and interact with vibrant computer content, using two hands to manipulate data in unique ways. Use natural hand gestures to engage dazzling graphics and special effects. Resize, reshape, rotate and zoom in and out of images on the fly. Or access the Internet in a truly compelling way. For years, GestureTek has been delivering these types of interactive surface solutions to nightclubs, hotels, stores and sales centers - and their customers are loving it!

GestureTek's standard turnkey Illuminate Multi-Touch Table

GestureTek's Illuminate Multi-Touch Table offers endless possibilities for presentations, public information, way-finding, entertainment, education and advertising – anywhere kiosk-style multi-media is required.

Choose our standard 32" high table with a 50" gesture-controlled tabletop screen or request custom services to deliver multi-touch surface designs of all shapes and sizes.

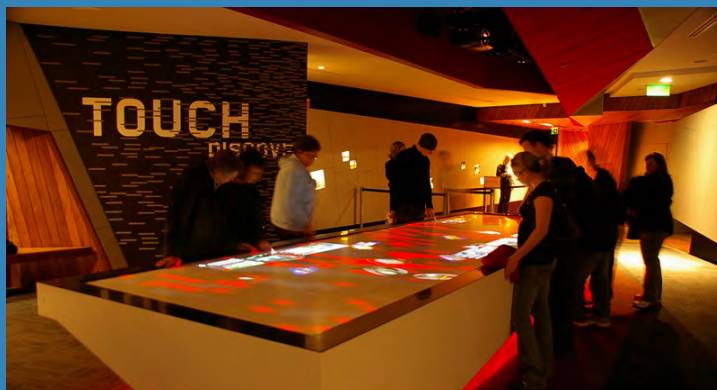

Illuminate Table engages and entertains restaurant patrons.

The Illuminate Table at Alice Fazooli's Restaurant in Toronto displays a rippling virtual fishpond that patrons can touch and interact with. Users can also control graphic effects and play digital games on the table.

GestureTek Inc. is the inventor and world leader in camera-enabled, gesture-based computer control. GestureTek's numerous patents for single and multiple-camera solutions are the basis for a wide variety of interactive solutions. Users interact with on-screen computer content using hand and body gestures, without the need for peripheral devices.

GestureTek technology is protected under numerous comprehensive patents in the United States and other countries. U.S. patents include 5,534,917 (Video image based control system), 7,058,204 (Multiple camera control system) and 7,227,526 (3D-vision image control system).

All trademarks and registered trademarks are the property of their respective owners.

GestureTek creates the world's largest surface computing table.

Visitors to the Eureka Tower in Melbourne, Australia experience GestureTek's state-of-the-art 'Serendipity Table'. At 18' x 5' it's the world's largest multi-touch table. With a wave of their hand, users can open up stories that recount the history of the city.

Stunning interactive orientation table lets users' fingers do the walking

GestureTek helped Samsung create a stunning 12' x 4' interactive Illuminate Table in Manhattan's Time Warner Center. Users gesture with their hands over specific city scenes to bring up information on their chosen point of interest.
